

Chapter 1: Straight Lines and Linear Functions

- * 1.2: Straight Lines
- * 1.3: Linear Functions and Mathematical Models
- * 1.4: Intersection of Straight Lines
- * 1.5: The Method of Least Squares

Chapter 2: Systems of Linear Equations and Matrices

- * 2.1: Systems of Linear Equations: An Introduction
- * 2.2: Systems of Linear Equations: Unique Solutions
- * 2.3: Systems of Linear Equations: Underdetermined and Overdetermined Systems
- * 2.4: Matrices
- * 2.5: Multiplication of Matrices
- * 2.6: The Inverse of a Square Matrix
- * 2.7: Leontief Input-Output Model

Chapter G: Game Theory

- * 9.4: Game Theory and Strictly Determined Games
- * 9.5: Games with Mixed Strategies

Chapter 3: Linear Programming: A Geometric Approach

- * 3.1: Graphing Systems of Linear Inequalities in Two Variables
- * 3.2: Linear Programming Problems
- * 3.3: Graphical Solutions of Linear Programming Problems
- * 3.4: Sensitivity Analysis

Chapter L: Logic

- * A.1: Propositions and Connectives
- * A.2: Truth Tables

Chapter 6: Sets and Counting

- * 6.1: Sets and Set Operations
- * 6.2: The Number of Elements in a Finite Set
- * 6.3: The Multiplication Principle
- * 6.4: Permutations and Combinations

Chapter 7: Probability

- * 7:1: Experiments, Sample Spaces, and Events
- * 7:2: Definition of Probability
- * 7:3: Rules of Probability
- * 7:4: Use of Counting Techniques in Probability
- * 7:5: Conditional Probability and Independent Events
- * 7:6: Bayes' Theorem

Chapter 8: Probability Distributions and Statistics

- * 8:1: Distributions of Random Variables
- * 8:2: Expected Value
- * 8:3: Variance and Standard Deviation
- * 8:4: The Binomial Distribution
- * 8:5: The Normal Distribution
- * 8:6: Applications of Normal Distribution
- * Poisson Distribution

Chapter 9: Markov Chains and the Theory of Games

- * 9:1: Markov Chains
- * 9:2: Regular Markov Chains
- * 9.3: Absorbing Markov Chains

Chapter 5: Mathematics of Finance

- * 5:1: Compound Interest
- * 5:2: Annuities
- * 5:3: Amortization and Sinking Funds
